POWERFEED SYSTEMS

Mains Powerfeed Systems for Overhead Cranes and Electric Hoists effeciently manage cables and transmit mains power to the hoist or crane. These are systems that transport power along the to the hoist and also provide cable management solutions to avoid any accidental bunching, snagging or breakage of the cables.

RCF CRANES offer high quality Festoon Systems, Cable Reeling Drums and Conductor Systems for all types of Overhead Cranes, KBK Cranes, Jib Cranes and Electric Hoists for effective power supply cable management.

For more information on our range of Powerfeed Systems for cranes, simply contact our friendly sales team who will be happy to assist you with your requirements and provide a no obligation quotation with suprisingly low prices!

RADIO CONTROL SYSTEMS

We supply and install various types of Radio Remote Control Systems to all kinds of Electric Hoists and Overhead Cranes.

Benefit from a wireless and ergonomic, aesthetically designed radio remote control system that enables the crane operator to remotely operate the crane or hoist, allowing him to gain a safe distance from the load and take a better point of view when operating.

We supply a range of excellent quality remote controls and receiver kits that are easily integrated into the existing controls, enabling full operation of all motions and speeds including emergency stop features.

Our systems comprise a hand held radio remote control (two with some brands), a charger and a receiver. The radio remote transmits the signal and command that you have selected which is instantly received and transferred into the controls of the crane or hoist by the receiver to carry out the task instantly.

Calibration Procedure: ICP-I-087

Summary of Procedure: The Unit under Test (UUT), an arc welding machine was calibrated by comparing the reading of UUT/control current setting against the known value using electrical measuring device. The mean value of the output current and voltage has derived from the measured increasing and decreasing value.

Environmental Condition: 23.9°C / 35.7% RH

Calibration Results: *(see the second page)*

Calibration Notes:

Basis of Tolerance: BS EN 50504:2008
The reported uncertainty of measurement is stated as the standard uncertainty measurement multiplied by the coverage factor k=2, providing a level of confidence of approximately 95%.
